

Page 10, line 12, after "for example." insert --As shown in Fig. 5, the proximal

segment 106 may include a braid 210 interposed between an inner proximal liner 212 and
an outer proximal cover 214. A coil 216 may also be interposed between the inner liner
212 and the outer cover 214. --

IN THE CLAIMS:

Sub B1
Claim 1 (amended). A catheter section comprising an elongate tubular member
having a proximal end, a distal end, and a passageway defining a lumen extending between
the proximal and distal ends, said elongate tubular member comprising a knit tubular
member and an inner tubular linear in coaxial relationship with the knit tubular member;
the knit tubular member being formed from a plurality of interlocking loops.

Sub B2
Claim 24 (amended). A catheter section comprising an elongate tubular member
having a proximal end, a distal end, and a passageway defining a lumen extending between
the proximal and distal ends, said elongate tubular member comprising an inner liner, an
outer cover, and a knit tubular member formed from a metal wire; the knit tubular member
being formed from a plurality of interlocking loops.

Sub B3
Claim 31 (amended). A catheter comprising an elongate tubular member having a
proximal end, a distal end, and a passageway defining a lumen extending between those
ends, said elongate tubular member comprising:
a relatively stiff proximal segment; and
